Luís SANTOS

Fullstack Developer

Experienced Full Stack Developer, strong background in multiple technologies including PHP/Laravel, Vue, and Python, applied to developing large-scale solutions where security and reliability are essential. Specializing in task automation, process optimization, and producing high-quality code within collaborative teams. Interested in DevOps and infrastructure, focusing on scalable cloud solutions.

Work experience

Fullstack developer

TLscontact (Telerformance), Lisbon Since October 2022

- Migration of a payment app from Lumen to Laravel
- Integration of 10+ payment platforms (HSBC, PayPal, etc.)
- Unit testing, end-to-end (E2E) testing with Cypress, test-driven development (TDD)
- Refactoring using SOLID principles, API documentation with Swagger
- Optimized REST APIs, scaling with Kubernetes (HPA)
- DDD/CQRS architecture, PostgreSQL performance tuning
- Incident management, leading refinement sessions (Agile/SCRUM)

Fullstack developer

Worten, Lisbon From July 2020 to October 2022

- REST APIs for ~3 million users.
- ETL pipelines in Laravel (Cassandra DB & Kafka)
- CI/CD with GitLab, Docker, Vue.js
- AWS infrastructure (Terraform), Shell scripting for automation

Fullstack developer

Futureway, Setubal, Portugal From July 2019 to July 2020

- Maintenance of 10+ PHP applications
- Migrate multiple applications from vanilla PHP to Laravel
- Mobile development with Ionic Framework and Angular
- Integrations with Google Maps and toonline

Education

How To Become An Outstanding Solution Architect

Udemy, Online January 2025

CCP (Certificate of Pedagogical Aptitude)

IEFP, Portugal July 2023

Credential ID: F743941/2023

Web Scraping and API Fundamentals in Python

Udemy, Online December 2021

Build a Backend REST API with Python & Django

Udemy, Online November 2021

Web Programming, Devices & Mobile Applications

ESTS Polytechnic Institute of Setubal, Setubal, SE, Portugal 2015

Tech Skills

Testing

PHPUnit, Pestphp and Cypress

Web & Mobile

Laravel, Vue.js, Nuxt.js, Next.js, jQuery
and Ionic

Messaging Systems

Apache Kafka

DevOps

AWS, Terraform and Kubernetes

Databases

PostgreSQL, MySQL, SQLite, OracleSQL,
Cassandra, MSSQL, MongoDB and
Firebase

Programming languages

PHP, Python, JavaScript, Go and Rust

Personal Projects

Open Source – PHP · Rust · JS

Contributions to open-source projects
e.g. [pestphp](#), [starship](#), [OneArmy](#).

Scraping API – Python – Energy suppliers NL

[Python tool](#) for web scraping and
automated data analysis via API

LinkedIn Auto-Connect – JavaScript

[Automation](#) of LinkedIn connections from
a targeted list.

Raspberry Pi – Python - Self-hosted audio library

Local/remote audio server via Raspberry
Pi, with automatic file synchronization.

E-commerce Laravel – TALL Stack
